

THE EDGE OF ASLAN'S RAZOR AND SPATIAL RELATIVITY

A Unified Theory of Consciousness, Time and Quantum Mechanics

Proposal Submission for the 2016 Science and Nonduality Conference to be held in San Jose, California.

Science so it seems tells us that all of reality is governed by the laws of physics, though misunderstood some may be, that allow for the operation of the Universal symphony of stars, planets, living organisms and everything else in existence, including the unseen world that most perceive as empty space.

And as humans, it appears that we are the only beings able to comprehend the vast complexities and systems that guide our momentary existence. Often, simplistically beautiful patterns that reflect these complex systems surround us in symbols embraced by cultures everywhere yet are sometimes easy to go unnoticed or misunderstood.

Nonduality guides us as we sift through the chaos, finding at the core, complex systems and fundamental principles, governed by the laws of physics as we know them, and the theories that help us understand the operations of this vast Universe, in search of our place.

Decades of random life experience allows the perspective to present the following materials and information that will give the viewer a specific understanding of how consciousness works in a systemic manner for individuals, groups and all living things, with findings of the Princeton Anomalies Research Laboratories and over 300 personal field experiments as supporting evidence that will be engaging and well understood.

The Logic Train

- A Brief & Simple History of Quantum Mechanics
 - 1900 – 1930
 - Double slit this - Relativity
 - Present Day
 - M-Theory - Electron (Quantum) Tunneling - Random Event Generators
- Paradoxical Proximities
 - Ockham's Razor
 - The Younger-Older Twins
 - Zeno Solvino and Infinite Pizzasphere
- Flatlanders and Overlords: Our Multi-dimensional Reality
 - The first 3
 - 4th
 - 5th
 - 6th – 10th
- Spatial Distortion - Molecule Displacement - Commingling
- Breakdown the Wave Function
 - Zero - Single - Multi - Fibonacci Breakdown
- The Hard Question Answered
 - Zero Point Time Dilation
 - Aetherspheric
- Research
 - Data, Timed Experiments, Experibitions
 - Results, Conclusions and Suppositions
- Thought Experiments

Short Biography of Leo Madrid

I inadvertently began studying consciousness during a decade long career as an engineer and TQM instructor with the U.S. Navy. Landing my dream job as a Training Specialist shortly after discharge with the leading manufacturer of computer chips, I became knowledgeable about semiconductor manufacturing.

The disillusionment of corporate culture crept in and I fled the 9-5 life to seek out the freedom art provided. First a dance instructor and then a career as art gallery consultant, a book about art & physics transmogrified my perspective which, when commingled with curiosity, coalesced my experiences and sculpted me into a consciousness researcher.
